

DMA After-School Parent Options

Device Management Application (DMA) software is installed in students' PLDs to provide a safer digital learning environment, and to prevent misuse of the device. Parents/guardians can choose between these 3 options to suit their preferences for managing the PLDs **after school hours**.

	OPTION A (DEFAULT)	OPTION B Modify DMA settings	OPTION C Disable DMA settings
<u>FILTERING OF WEB CONTENT</u>	MOE / School sets the level of filtering	Parent can apply additional filters	No content filtering
<u>CONTROL OF APPLICATIONS</u>	Parent cannot install additional applications	Parent can install additional applications*	Parent can install additional applications*
<u>LIMITS TO SCREEN TIME</u>	School sets limits for screen time	Parent can modify limits for screen time	No limits to screen time
<u>MONITORING OF CYBER ACTIVITIES</u>	Parent can monitor child's browser history	Parent can monitor child's browser history	No data is collected Parent cannot monitor child's use of the device through the DMA

Opting for the Default DMA setting for after-school use is the best option for parents who prefer not to or do not feel ready to manage their child's device use on their own.

What's next?

- School will inform parents about how to exercise their DMA after-school option.
- Parents can request to change their DMA option subsequently. The request will be processed by the school at **the end of every month upon receipt of request before the 15th of each month**. An email confirmation will be sent to confirm the updated after-school DMA option once it has been activated. Request made after the 15th of each month will only take effect the following month.

**Applications installed by parents/guardians and/or students after school hours will be disabled during school hours.*
